

28 November 2022

Dear Parent/Carer

To ensure your son/daughter is best prepared for their GCSE Science exams it is imperative that revision is completed frequently. Educational research shows that revisiting topics and continual practice of work is vital and the key to success in good exam performance. Therefore, we would like to offer each GCSE student an opportunity to make use of other resources to support and extend their knowledge and understanding of the Science topics that are taught.

The revision guide your son/daughter should purchase depends on which course they are following.

Students will either be following:

- AQA Trilogy Combined Science Course (Higher Tier)
- AQA Trilogy Combined Science (Foundation Tier)
- Separate Science (Biology, Chemistry and Physics)

All revision guides are up to date, the content is explained clearly and concisely, with brilliant coverage of all the required practicals, maths skills and advice on working scientifically. In addition, there are review questions as well as exam style questions to test the students on what they have learned.

Using these revision guides alongside their class notes and homework will ensure a successful outcome in their GCSE Science.

Combined Science revision guides cost £10 and contain everything required for all six papers. Separate science guides cost £5 each and contain everything required for Biology, Chemistry and Physics.

Payment is required by Parentpay, no later than 5th December 2022, when paying can you please ensure you put the correct amount in the payment and confirm which revision guide is required in the note's column. The revision guides should be available the last week of term. **Please note we cannot accept any payments after the 5th December 2022 as we have to put an order though.**

Yours sincerely

N Moody

Mrs Moody
(Second in Science)
